

Dr Kelvin Momanyi, BVM, MSc

[Dr Kelvin Momanyi](#) is a board-certified Kenyan veterinarian with over 8 years professional and research experience in One Health, Veterinary Medicine, Animal Welfare and public science communication. Dr Momanyi holds a Masters of Science in One Health from the University of Edinburgh and a Bachelor of Veterinary Medicine from the University of Nairobi. He was the recipient of the [Young Veterinarian of the Year Award](#) (2016/17) conferred by the Kenya Veterinary Association for his active involvement and contribution to veterinary matters in Kenya. He is currently working as a Campaigns Officer for the World Animal Protection (Africa office) where he provides specialized campaigning expertise in ongoing and emerging work within the Farming campaigns in Africa. Previously, Dr Momanyi worked as a Research Associate for the International Livestock Research Institute where he was involved in developing an integrated surveillance system for 15 zoonotic pathogens under the [ZooLink](#) suite of projects. His interests are in championing the One Health discipline and the benefits that come from multidisciplinary collaborative approaches, which resulted to him forming the [Transdisciplinary Consultants](#) envisioned to improve the lives of all species, human and animal, through smart One Health application. His previous research has been on the evaluation of the [implementation of One Health in Kenya](#) using the [NEOH](#) One Health framework and previously worked on a study exploring [One Health and cancer](#) in humans and dogs.
